**Adding Knowledge
to Chemistry**

Knowledge

Our Key Ingredient

The one thing that has defined SPC Lifesciences over the past decade is creating pharmaceutical breakthroughs that are led by deep insight and knowledge.

SPC Lifesciences is a truly innovative and fully integrated pharmaceutical company creating global solutions. We are the leading manufacturer & exporter of a broad range of pharmaceutical active ingredients and intermediates which are extensively used in various finished doses & research laboratories.

By maintaining leadership and competitiveness in various therapeutic domains, SPC's API business has ensured the profitability and growth of the company's chemical synthesizing business in addition to being one of the finest suppliers of intermediates in India and Internationally.

Key Offerings

- Active Pharmaceuticals Ingredients (APIs)
- Advanced Intermediates
- Contract Manufacturing of APIs and Intermediates (With or without technology transfers)

Sources of Revenue

Revenue from Customers in Regulated Markets **100%**

R&D

Our Innovative Edge

We go beyond the approach of just synthesizing chemicals & APIs, to creating innovative & better healthcare outcomes. Every product we create, is born to advance the future of the final dose.

As one of the inventive Indian pharmaceutical companies, we see tremendous value in investing in Research & Development (R&D). Our early investments in R&D enabled us to make technology our key differentiator and develop a basket of robust products for diverse markets across the world. Our scientists work closely with our business development team to generate innovative concepts and ideas, exploiting both market needs and synergies across therapeutic areas.

Formulating New Breakthroughs

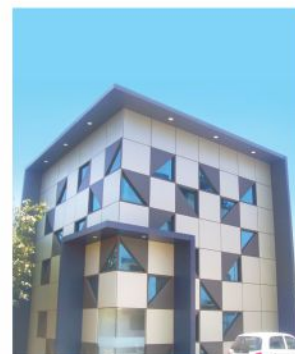

Our products received a grant for patent in 2010 in India and in 2015 from the Chinese Patent Office.

Quality

Our Sharp Edge

One of the key reasons our clients like to work with us, is because we ensure that our quality works for them. That is why every step of our process is underlined by our promise to deliver high-performance solutions.

We are committed to comprehensive reviews of quality trends & improvements, to ensure a singular quality process that is continually assessed and refined. Using high quality chemicals, our intermediates & APIs are manufactured to ensure desired efficacy and our ONE QUALITY CONCEPT keeps pushing the quality standard higher and setting new benchmarks.

We adhere to ISO 9001 and ISO 14001 standards controlled by Quality Assurance Group

Documentation on CGMP guidelines right from raw material receipt, manufacturing to finished products & services

World's largest manufacturer of Pentoxifylline intermediates

Manufacturing

Our Engineering Edge

At SPC Lifesciences our knowledge is backed up by state-of-the-art facilities. That is how we ensure that our comprehensive product solutions are matched by our ability to deliver across every complex project.

Spread across an area of 10,000 m², SPC operates three multi-purpose manufacturing blocks for Basic Intermediates, Advanced Intermediates & Strategic Products respectively at Ankleshwar.

Backed by SPC's technical know-how & manufacturing support, partnerships with 5 other manufacturing facilities ensure a smooth flow of basic intermediates feeded to our main plant.

Our onsite processing capacity of 180 KL equipped with five finishing areas for solid & liquid handling along with warehousing and effluent treatment facilities ensure multi-product management with regulatory compliance for intermediates of various scale from 1 MT to 35 MT per month.

SPC's plants work on the principle of deploying operational excellence as a strategic tool, where analysis of operational parameters & continuous improvements are the key to achieve quality with right efficiency.

Team

Our Cutting Edge

Our ability to be better than the rest arises from every team member's ability in pushing the envelope of innovation. Our team thrives on challenging assignments to set new standards of performance, every time.

At SPC, we take pride in our dedicated workforce, a growing think tank of knowledge and experienced individuals from varied fields. Besides our investments in training, we ensure that our teams are constantly challenged & motivated through participations & out-of-office activities. Moreover, our HR policies also ensure the overall development of employees in their journey towards excellence.

Milestones

Our Journey in pursuit of constant innovative transformation

2005

Inception of company and taking over operations of chemical plant at Ankleshwar

2008

SPC certified as an Export House by Govt. of India

2011

Granted first process Patent for India

2016

Investment of INR 170 million for new plant & infrastructure development

2007

- Investment of INR 50 million and EOU (Export Oriented Unit) status granted to Ankleshwar unit
- Research division certified by DSIR for in-house research activities

2010

Investment of INR 75 million for new warehouse, QC laboratories and infrastructure development

2015

Granted process Patent for China
